VAMSIKRISHNA GOLLAPUDI

AZURE DEVOPS ENGINEER | SITE RELIABILITY ENGINEER (SRE) | AZURE INFRASTRUCTURE | KUBERNETES (AKS) | TERRAFORM

Bengaluru, India | +91 99663 18185 | vamsi.gollapudi85@gmail.com | Open to Remote
LinkedIn: https://www.linkedin.com/in/vamsikrishna-gollapudi-b2a490447

PROFESSIONAL SUMMARY

Azure DevOps Engineer and Site Reliability Engineer with 9+ years of IT experience, progressing from Linux and Windows Server administration into Azure cloud infrastructure, CI/CD automation, Kubernetes platform operations and SRE for enterprise clients in life sciences, banking and asset management. Hands-on with Microsoft Azure (IaaS, networking, identity, governance), Terraform, Bicep, ARM templates, AKS, Helm, Docker, GitHub Enterprise, GitHub Actions and Azure Pipelines on a strong Linux (RHEL, Ubuntu) foundation. Migrated ~120 repositories to GitHub Enterprise, moved 160+ on-premises servers to Azure with zero data loss, reduced MTTR by ~35% and cut Azure spend by ~18%. Known for clear documentation, blameless incident culture and reliable delivery with distributed teams across time zones.

CORE COMPETENCIES

Azure Infrastructure | Azure DevOps | Site Reliability Engineering (SRE) | Kubernetes and AKS | Terraform and Infrastructure as Code (IaC) | GitHub Enterprise and GitHub Actions | CI/CD Pipelines | DevSecOps | Cloud Migration (Azure Migrate, Azure Site Recovery) | Linux Administration (RHEL, Ubuntu) | Windows Server and Active Directory | Monitoring, Observability and Incident Management | Cloud Security and Governance | Cost Optimization (FinOps) | Disaster Recovery

TECHNICAL SKILLS

- **Cloud Platform:** Microsoft Azure – Virtual Machines, VM Scale Sets (VMSS), Virtual Network, VNet Peering, NSG, Load Balancer, Application Gateway, VPN Gateway, Azure DNS, Private DNS, Storage Accounts, Entra ID, Key Vault, Azure Functions, Logic Apps, App Service, Azure SQL; AWS (fundamentals)
- **Containers & Orchestration:** Kubernetes, Azure Kubernetes Service (AKS), Helm, Docker, Azure Container Registry (ACR), NGINX Ingress, Horizontal Pod Autoscaler, Cluster Autoscaler
- **Infrastructure as Code:** Terraform (modules, remote state, workspaces, drift detection), Bicep, ARM Templates, Ansible
- **CI/CD & Source Control:** Azure DevOps (Pipelines, Repos, Artifacts, Boards), GitHub Enterprise, GitHub Actions, Git, YAML multi-stage pipelines, release management, branching strategies, SonarQube
- **Monitoring & SRE:** Azure Monitor, Log Analytics (KQL), Application Insights, Prometheus, Grafana, Splunk, SLI/SLO, error budgets, runbooks, on-call, root cause analysis, capacity planning
- **Security & Governance:** Azure RBAC, Azure Policy, Management Groups, Microsoft Defender for Cloud, Managed Identities, Conditional Access, secrets management, container image scanning, SAST
- **Migration & DR:** Azure Migrate, Azure Site Recovery (ASR), Azure Backup, lift-and-shift (rehost), wave planning, cutover runbooks
- **Operating Systems:** Linux (RHEL, Ubuntu) – systemd, LVM, cron, SSH, yum/dnf, apt; Windows Server 2012/2016/2019 – Active Directory, Group Policy, DNS, DHCP
- **Scripting & Automation:** Bash, PowerShell, Python, YAML

PROFESSIONAL EXPERIENCE

Site Reliability Engineer
Jan 2025 – Present

Nexamatic | Bengaluru, India | Clients: IQVIA, Adamas (Life Sciences)

- Designed and operated a multi-subscription Azure landing zone (8 subscriptions, 600+ resources) across compute, networking, identity and shared services, sustaining 99.95% platform availability.
- Led the migration of ~120 repositories and 45 teams from Azure Repos to GitHub Enterprise with under 30 minutes of total developer downtime, standardizing branch protection and CODEOWNERS to reach 100% pull-request review coverage.
- Converted 60+ classic release pipelines into GitHub Actions workflows and reusable multi-stage Azure DevOps YAML templates, reducing new-service onboarding from ~3 days to under 4 hours.
- Authored 25+ versioned Terraform modules and Bicep templates with remote state, policy checks and nightly drift detection, bringing 100% of environments under Infrastructure as Code.

- Operated 6 production AKS clusters (180+ nodes, 300+ pods) using Helm, NGINX Ingress, HPA and Cluster Autoscaler, delivering quarterly Kubernetes and node-pool upgrades with zero customer-facing outages.
- Built an SRE practice on SLIs, SLOs, error budgets and 40+ runbooks, and improved incident triage and escalation, reducing MTTR by ~35%.
- Implemented Prometheus, Grafana, Azure Monitor and Log Analytics dashboards with 150+ alert rules, routing logs to Splunk and cutting alert noise by 40%.
- Embedded SAST, container image scanning, secret detection and Key Vault integration into CI/CD pipelines, blocking 200+ vulnerable builds before production.
- Raised Microsoft Defender for Cloud Secure Score from 62% to 85% and defined tenant-wide governance (management groups, custom RBAC roles, tagging), reaching 98% tagging compliance and passing two client audits without major findings.
- Automated certificate-expiry alerts, non-production scale-down and ticket creation with Azure Functions and Logic Apps, saving ~20 engineer-hours monthly and reducing non-production compute cost by 22%.
- Ran blameless post-incident reviews and the on-call rotation for a 10-member team, closing 90% of corrective actions within 30 days, and mentored 4 junior engineers.
- Published 30+ architecture notes and operational guides, reducing recurring L2 escalations by 25%.

Azure DevOps Engineer *Apr 2024 – Jan 2025*

Kumaran Systems | Bengaluru, India | Client: CIBC (Banking)

- Designed Azure DevOps build and release pipelines for 35+ banking services with approval gates, pre-release validation and change-management checks, delivering 100% audit traceability.
- Introduced Terraform to provision virtual networks, storage accounts and virtual machines across 4 environments, reducing environment setup from ~3 days to 4 hours.
- Migrated 40 classic release definitions to multi-stage YAML pipelines, cutting pipeline maintenance effort by 50%.
- Containerized 15 services with Docker, publishing images to Azure Container Registry and deploying to AKS through Helm-based pipelines.
- Integrated SonarQube quality gates and dependency scanning into pull-request validation, catching 120+ critical vulnerabilities before release.
- Secured 300+ secrets and connection strings in Azure Key Vault with managed identities, removing all plain-text credentials from 35 pipelines.
- Defined a Git branching and release strategy for 6 squads with semantic versioning, enabling 40% faster hotfix turnaround.
- Controlled environment promotion through versioned packages in Azure Artifacts, keeping rollback time under 15 minutes.
- Increased deployment frequency from bi-weekly to 3 releases per week while keeping change-failure rate below 5%, and embedded regression suites with QA to shorten release cycles by ~30%.
- Wrote PowerShell and Python scripts for health checks, log cleanup and deployment verification, and set up Azure Monitor and Application Insights alerts, saving ~15 hours of manual effort weekly.

Cloud Infrastructure Engineer *May 2022 – Jun 2023*

UST Global | Hyderabad, India | Client: Schroders (Asset Management)

- Built and supported an Azure IaaS and PaaS environment of 250+ resources, including virtual machines, VM scale sets, App Service, Azure SQL and storage accounts.
- Rehosted 45 on-premises Windows and Linux servers to Azure using Azure Migrate and Azure Site Recovery across 5 waves with zero data loss.
- Codified infrastructure in ARM templates with standard naming, tagging and network layouts across 3 environments, speeding up provisioning by 70%.
- Engineered hub-and-spoke virtual networks with subnets, NSGs, load balancers, private DNS and site-to-site VPN links to 2 on-premises data centers.
- Implemented Azure Backup and Azure Site Recovery for 60 critical workloads, meeting a 4-hour RTO and 15-minute RPO in semi-annual DR drills.
- Managed access with Entra ID groups, Conditional Access and RBAC, removing 150+ excess role assignments during a least-privilege review.
- Hardened 120+ virtual machines and 40 storage accounts against Defender for Cloud recommendations, raising compliance from 70% to 96% in 3 months.
- Right-sized virtual machines and storage tiers based on utilization analysis, lowering monthly Azure spend by ~18%.
- Created the first Azure DevOps pipelines for infrastructure deployment, replacing manual releases for 12 application teams.

Tech Lead — *Dec 2020 – Apr 2021*

Cognizant | India | Client: Bayer (Life Sciences)

- Led an on-premises-to-Azure migration work stream, assessing 180+ servers and application dependencies with Azure Migrate.
- Planned 6 migration waves with cutover and rollback runbooks, leading a 5-member team through the lift-and-shift of 120 Windows and Linux servers.
- Set up landing-zone foundations for 3 environments: 12 virtual networks, 2 site-to-site VPN tunnels, storage and identity sync for 5,000+ Active Directory accounts.
- Coordinated validation with 20+ application owners and reported weekly to the client steering committee, achieving 98% first-attempt cutover success.
- Decommissioned 40 legacy servers after migration, saving an estimated 15% of data-center hosting cost.

System Administrator (Linux & Windows) — *Oct 2015 – Dec 2020*

Anewa Engineering Pvt. Ltd. | India | Client: NPCC

- Administered 150+ RHEL, Ubuntu and Windows Server systems (installation, configuration, patching, health checks) for 1,200 users, maintaining 99.9% uptime.
- Troubleshot high CPU, memory and disk usage and failed services using top, vmstat, iostat, journalctl and Event Viewer, cutting average resolution time by 30%.
- Managed Active Directory (1,200+ accounts), Group Policy, file shares, NTFS permissions, DNS and DHCP.
- Applied monthly OS security patches with yum, apt and WSUS, sustaining 97% patch compliance.
- Upgraded 30 servers from Windows Server 2008 R2 to 2016 and migrated departmental file shares with no data loss.
- Wrote Bash and batch scripts for user creation, disk cleanup and log rotation, saving ~10 hours of manual work per week.

EDUCATION

- Master of Computer Applications (MCA), Jawaharlal Nehru Technological University (JNTU), Hyderabad, 2010
- Bachelor of Science (B.Sc.), Computer Science, Acharya Nagarjuna University, 2007

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Kubernetes and Cloud Native Associate (KCNA), The Linux Foundation

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Telugu
- **Notice Period:** 15 days; open to remote roles
